

	<p><b><u>Make-up</u></b>  The ancient Egyptians invented a variety of different types of make-up. They had blue-grey and green colours to paint their eyes. They had a red colour to make their cheeks look red.</p>
	<p><b><u>Pyramids</u></b>  These were the massive stone constructions built as tombs for dead pharaohs. They have been a source of awe throughout history because of their size, the amount of stone used to build them and the number of men that would have worked to make them.</p>
	<p><b><u>Mummification</u></b>  This is the special way ancient Egyptians preserved the bodies of the dead.</p>
	<p><b><u>Hieroglyphics</u></b>  This is the name for Egyptian writing.</p>
	<p><b><u>Papyrus</u></b>  This was paper made from reeds found on the edge of the River Nile.</p>
	<p><b><u>Mud bricks</u></b>  The Egyptians invented mudbricks to build ordinary homes from.</p>
	<p><b><u>Board games</u></b>  The Egyptians invented board games to entertain themselves.</p>

**Irrigation and Shaduf**

The ancient Egyptians made special canals that brought water inland from the Nile. This helped them water their crops when it was very hot.

**Calendar**

The ancient Egyptian calendar was a solar calendar with a 365-day year. It had 365 days just like the calendar we use today.
